Minimization

Dr.Ebtsam Abdelhakam Eldesoky

Minimization of FSM

The minimization of FSM means **reducing the number of states from given FA thus we get the FSM with redundant states after minimizing the FSM.**

While minimizing FSM we first find out which two states are equivalent we can represent those two states by one representative state.

Task 1:

Minimization the given FSM by finding equivalent states.

DFA Minimization

- DFA Minimization using Equivalence Theorem
- If X and Y are two states in a DFA, we can combine these two states into $\{X, Y\}$ if they are **not distinguishable**.
- Two states are distinguishable, if there is at least one string S , such that one of $\delta(X, S)$ and $\delta(Y, S)$ is accepting and another is not accepting.
- Hence, a DFA is minimal **if and only if all the states are distinguishable**.

DFA Minimization algorithm

Step 1:

Partition all states into **two groups**, one containing **final** states whereas the other containing **non-final** states.

Step 2:

Find transitions of all states of each group for each input symbol.

Step 3:

Two states are said to be non-equivalent, if for an input symbol they have transitions to states of different groups.

Then separate the two states into two different subgroups.

Step 4:

Repeat Step 2 and Step 3 until we get groups that **no longer can be subdivided**.

DFA Minimization Example

$\{a, b, f\}$ $\{c, d, e\}$

Example

DFA Minimization

$\{a, b, f\}$ $\{c, d, e\}$
 $\{a, b\}$ **$\{f\}$** $\{c, d, e\}$

Example

DFA Minimization

$\{a, b, f\}$ $\{c, d, e\}$
 $\{a, b\}$ $\{f\}$ $\{c, d, e\}$
 $\{a, b\}$ $\{f\}$ $\{c, d, e\}$

Example

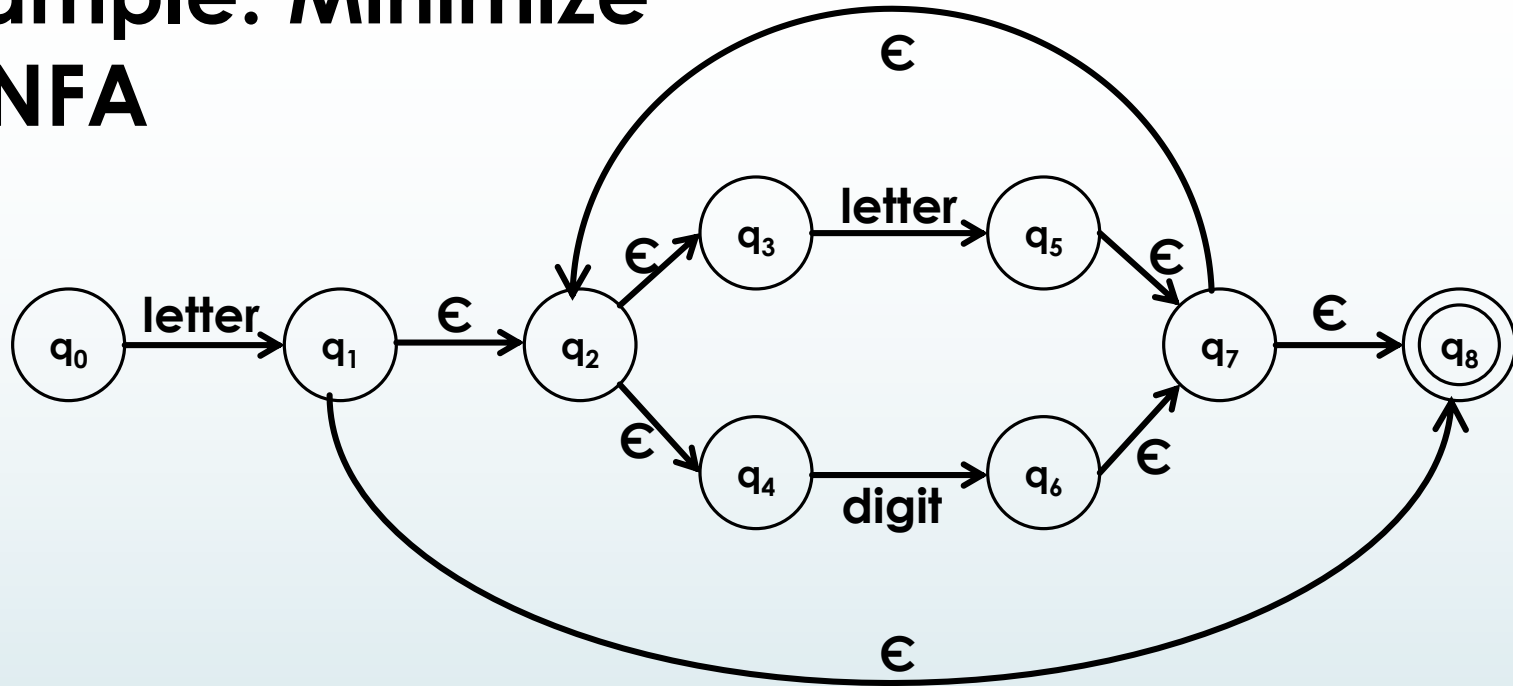

DFA Minimization

{a, b, f} {c, d, e}
 {a, b} {f} {c, d, e}
 {a, b} {f} {c, d, e}

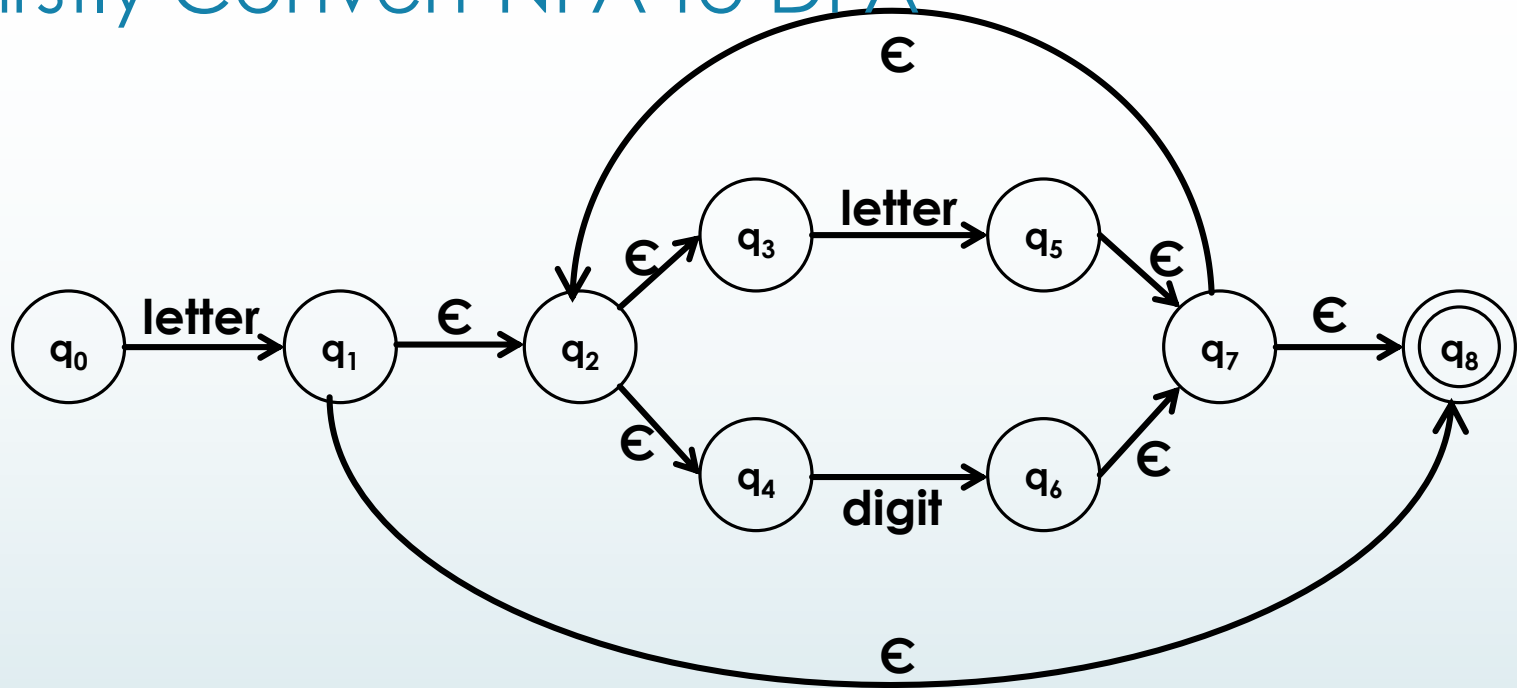

Example: Minimize ϵ -NFA

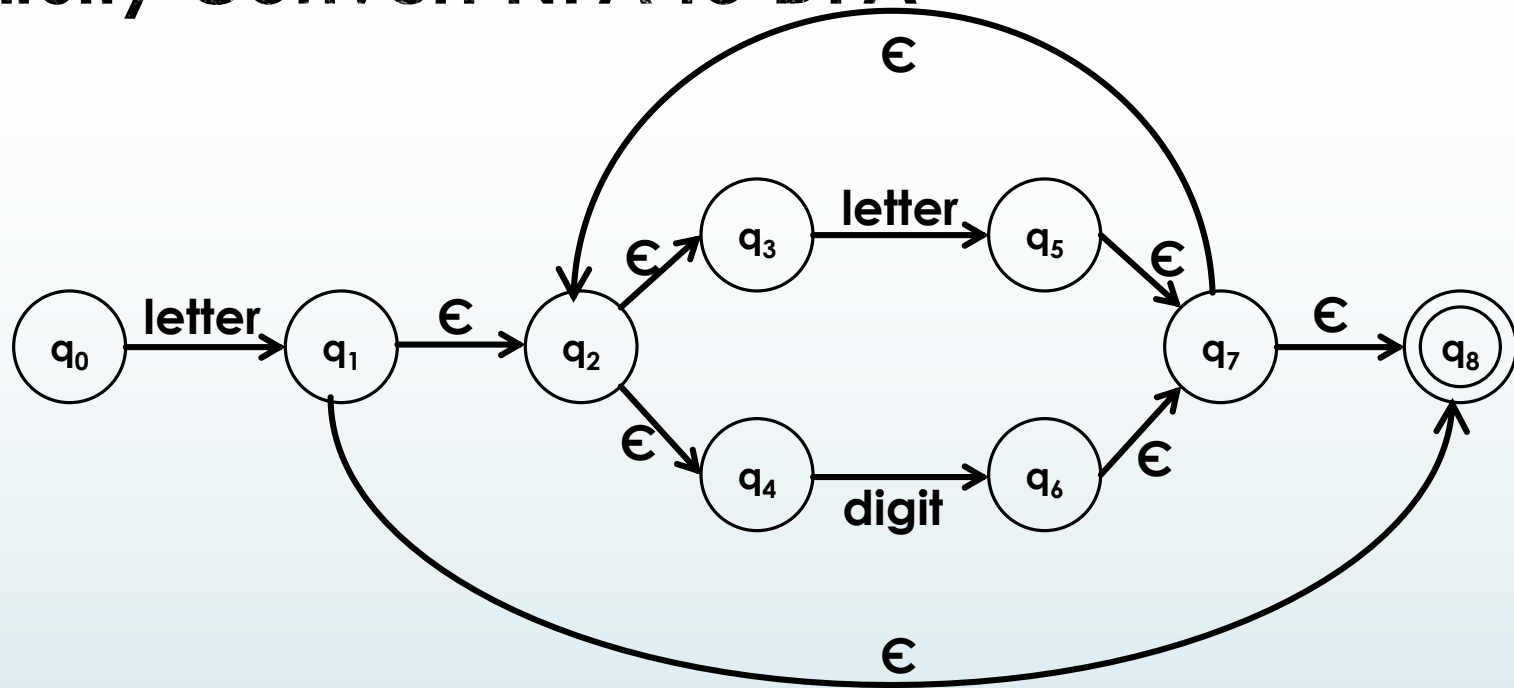

q	$\delta(q, \text{letter})$	$\delta(q, \text{digit})$
q_0	$\{q_1 q_2 q_3 q_4 q_8\}$	\emptyset
$\{q_1 q_2 q_3 q_4 q_8\}$	$\{q_2 q_3 q_4 q_5 q_7 q_8\}$	$\{q_2 q_3 q_4 q_6 q_7 q_8\}$
\emptyset	\emptyset	\emptyset
$\{q_2 q_3 q_4 q_5 q_7 q_8\}$	$\{q_2 q_3 q_4 q_5 q_7 q_8\}$	$\{q_2 q_3 q_4 q_6 q_7 q_8\}$
$\{q_2 q_3 q_4 q_6 q_7 q_8\}$	$\{q_2 q_3 q_4 q_5 q_7 q_8\}$	$\{q_2 q_3 q_4 q_6 q_7 q_8\}$

Firstly Convert NFA to DFA

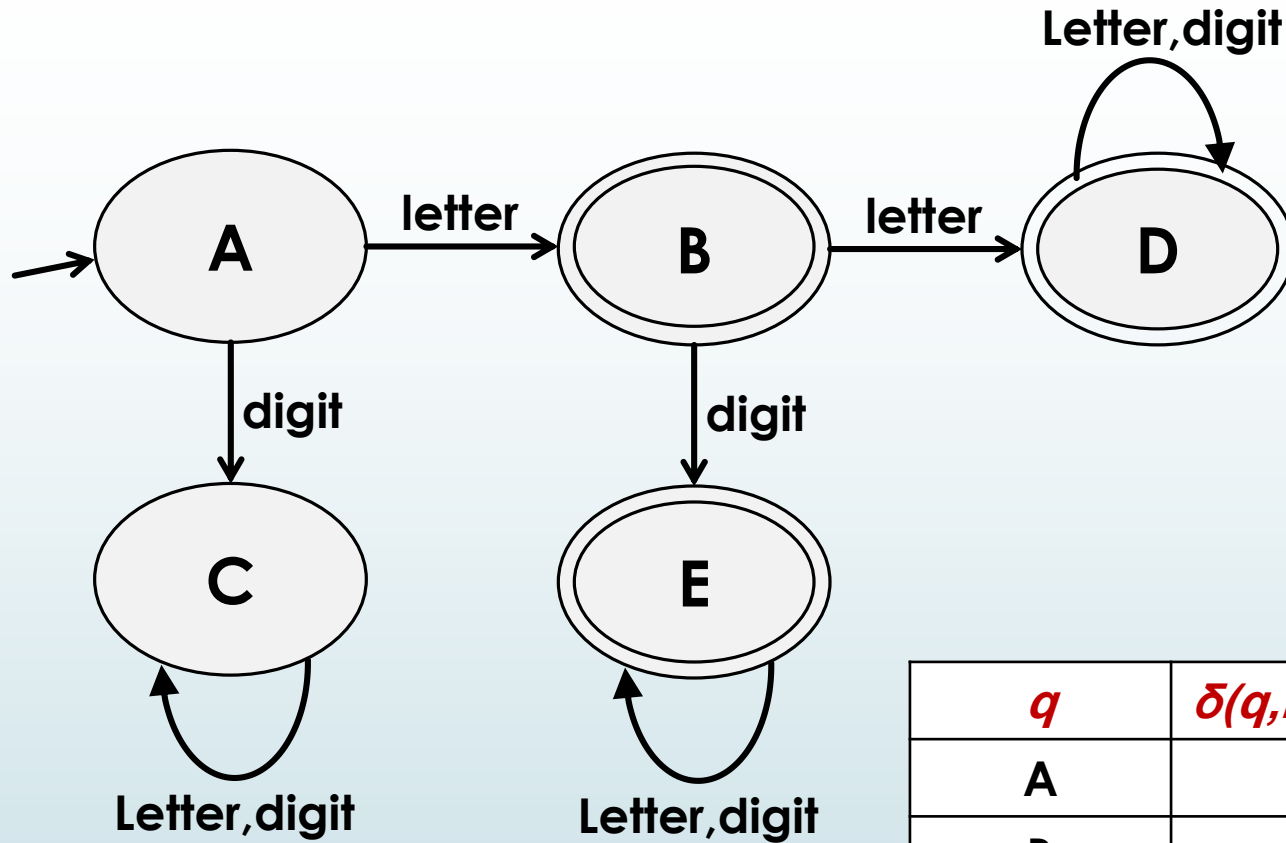

<i>q</i>		<i>$\delta(q, \text{letter})$</i>		<i>$\delta(q, \text{digit})$</i>	
q₀	A	{q₁q₂q₃q₄q₈}	B	∅	C
{q₁q₂q₃q₄q₈}	B	{q₂q₃q₄q₅q₇q₈}	D	{q₂q₃q₄q₆q₇q₈}	E
∅	C	∅	C	∅	C
{q₂q₃q₄q₅q₇q₈}	D	{q₂q₃q₄q₅q₇q₈}	D	{q₂q₃q₄q₆q₇q₈}	D
{q₂q₃q₄q₆q₇q₈}	E	{q₂q₃q₄q₅q₇q₈}	E	{q₂q₃q₄q₆q₇q₈}	E

Firstly Convert NFA to DFA

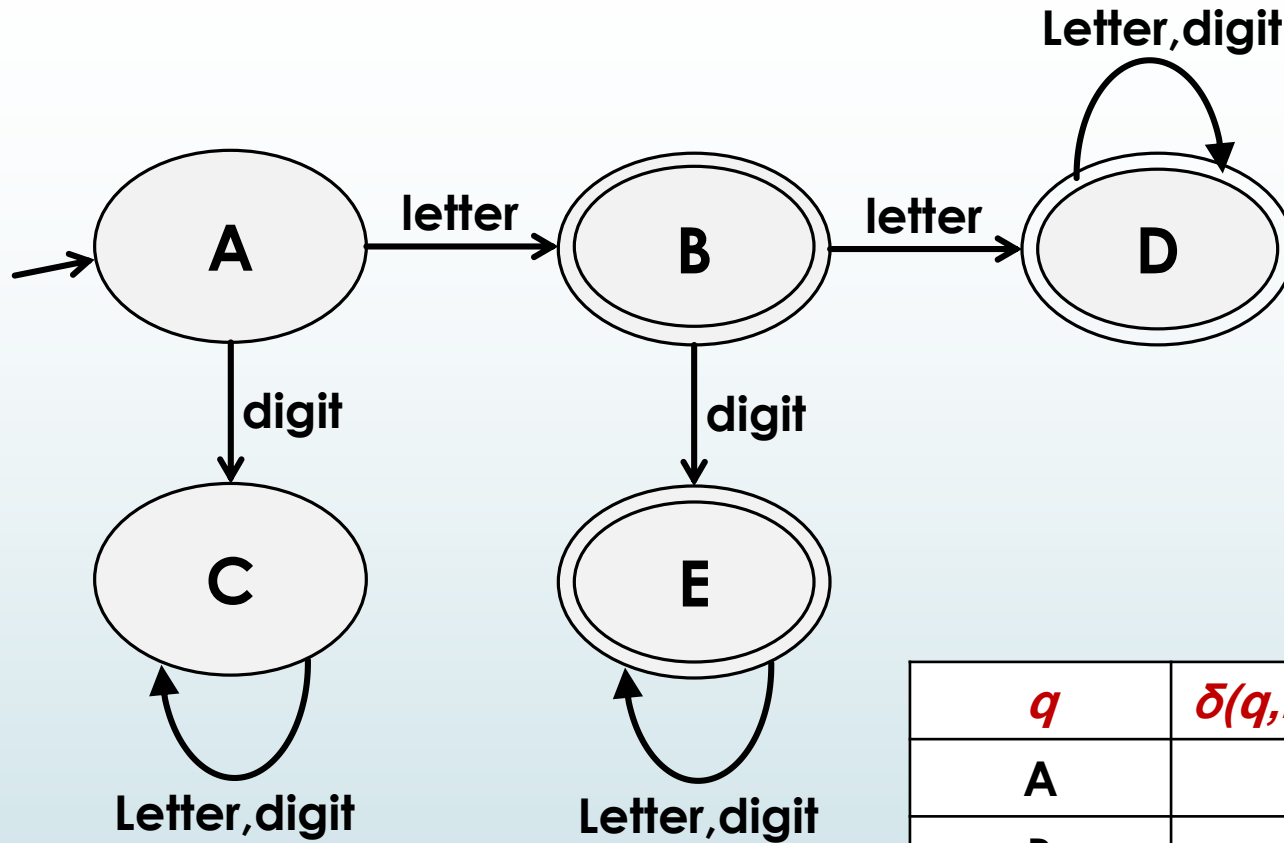

<i>q</i>	<i>$\delta(q, \text{letter})$</i>	<i>$\delta(q, \text{digit})$</i>
A	B	C
B	D	E
C	C	C
D	D	D
E	E	E

Firstly Convert NFA to DFA

<i>q</i>	<i>$\delta(q, letter)$</i>	<i>$\delta(q, digit)$</i>
A	B	C
B	D	E
C	C	C
D	D	D
E	E	E

Firstly Convert NFA to DFA

{A, C} {B, D, E}

<i>q</i>	<i>$\delta(q, letter)$</i>	<i>$\delta(q, digit)$</i>
A	B	C
B	D	E
C	C	C
D	D	D
E	E	E

Secondly DFA Minimization

{A, C} {B, D, E}
{A} {C} {B, D, E}
{A} {C} {B, D, E}

<i>q</i>	<i>$\delta(q, letter)$</i>	<i>$\delta(q, digit)$</i>
A	B	C
B	D	E
C	C	C
D	D	D
E	E	E
